Service and responsibility

We provide managed infrastructure and recovery support. Amina Bello, Security Manager, is responsible for the supporting access and recovery records.

Previously reported position

The sample access register listed 20 administrative accounts. The reporting-service recovery exercise took 145 minutes against a 120-minute target. Operations scheduled a repeat exercise after correcting the restore sequence.

What the replacement must explain

The bank reviewer needs the repeat test result and confirmation that inactive accounts were removed. This prior declaration remains useful for comparing changes but is not a current assurance statement.
